Having regard to Council Directive 77/93/EEC of 21 December 1976 on protective measures against the introduction into the Community of organisms harmful to plants or plant products and against their spread within the Community ⁽¹⁾, as amended by Commission Directive 1999/53/EC ⁽²⁾, and in particular Article 14(1) thereof,

Having regard to the request made by the United Kingdom,

Whereas:

- (4) In relation to the requirements laid down in point 25.2 of Annex IV, part A, section I to Directive 77/93/EEC and on the basis of information provided by New Zealand, and international scientific technical literature, New Zealand is known to be free from *Clavibacter michiganensis* (Smith) Davis et al. ssp. *sepedonicus* (Spieckermann & Kotthoff) Davis et al.
- (5) It is expected that New Zealand make available all technical information necessary to assess in the future, the phytosanitary status of potato production in New Zealand, in particular details on the regular monitoring of seed and ware potatoes imported into, and marketed

within New Zealand by means of examination and testing of representative samples by scientifically recognised methods for *Ralstonia solanacearum* (Smith) Yabuuchi et al., as well as the results of the said examination and testing.
