EPPO Technical bodies

Panel members are nominated by their National Plant Protection Organizations and provide independent expertise at the meetings.

Working Party on Phytosanitary Regulations

- Panel on phytosanitary measures
- Panel on CPM affairs
- Panel on quarantine pests for forestry
- Panel on phytosanitary treatments
- Panel on PRA development
- Panel on phytosanitary procedures
- Joint EPPO/OIBC Panel on biological control agents
- Panel on phytosanitary measures for potatoes
- Panel on Invasive Alien Plants
- Ad hoc Panel on plant protection information
- Panel on diagnostics and quality assurance
- Panel on diagnostics in nematology
- Panel on diagnostics in bacteriology
- Panel on diagnostics in entomology
- Panel on diagnostics in virology and phytoplasmology
- Panel on diagnostics in mycology

Working Party on Plant Protection Products

- Panel for the efficacy evaluation of fungicides and insecticides
- Panel for the efficacy evaluation of herbicides and plant growth regulators
- Panel on general standards on efficacy evaluation
- Resistance Panel on Plant Protection Products
- Ad hoc expert Working Group on extrapolation tables for minor uses
- Ad hoc Panel on harmonization of data on plant protection products

Aims

- To protect plant health in agriculture, forestry and the uncultivated environment.
- To develop an international strategy against the introduction and spread of pests (including invasive alien plants) that damage cultivated and wild plants, in natural and agricultural ecosystems.
- To encourage harmonization of phytosanitary regulations and all other areas of official plant protection action.
- To promote the use of modern, safe, and effective pest control methods.
- To provide a documentation service on plant protection.

Status

The European and Mediterranean Plant Protection Organization (EPPO) is an intergovernmental organization responsible for international cooperation in plant protection in the European and Mediterranean region. In the sense of the article IX of the FAO International Plant Protection Convention (IPPC), it is the Regional Plant Protection Organization for Europe. Founded in 1951 with 15 member governments, it now has 52 member governments including nearly every country of Western and Eastern Europe and the Mediterranean region.

Structure

The Organization is administered by its Executive Committee (7 governments elected on a rotational basis, meeting twice a year), under the control of its Council (representatives of all member governments, meeting once a year) headed by a Chairman and a Vice-Chairman, elected as individuals. A Secretariat of 16 persons is headed by a Director-General and Assistant Director. EPPO is financed directly by annual contributions from its member governments. Its official languages are English, French and for certain purposes Russian. EPPO is also hosting two networks: Euphresco (research funders) and the EU Minor Uses Coordination Facility (MUCF).

Current EPPO member countries are shown in green.

EPPO Member Countries (2019-01)

Albania  |  Algeria  |  Austria  |  Azerbaijan  |  Belarus  |  Belgium  |  Bosnia and Herzegovina  |  Bulgaria  |  Croatia  |  Cyprus  |  Czechia  |  Denmark  |  Estonia  |  Finland  |  France  |  Georgia  |  Germany  |  Greece  |  Guernsey  |  Hungary  |  Israel  |  Italy  |  Jersey  |  Jordan  |  Kazakhstan  |  Latvia  |  Lithuania  |  Luxembourg  |  Macedonia (FYROM)  |  Malta  |  Moldova  |  Montenegro  |  Morocco  |  Netherlands  |  Norway  |  Poland  |  Portugal  |  Romania  |  Russia  |  Serbia  |  Slovakia  |  Slovenia  |  Spain  |  Sweden  |  Switzerland  |  Turkey  |  UK  |  Ukraine  |  Uzbekistan

EPPO - Profile of an International Organization

2019-01

EPPO - Profile of an International Organization

2019-01
The Working Parties draw up their programmes subject to the approval of the Executive Committee and Council. They assign specific tasks to Panels, composed of specialists from Member Countries nominated as individuals, which prepare detailed draft recommendations for the Working Parties. Every year, 20-25 Panel meetings are held in Paris or in scientific centres throughout the region. The technical work of the Organization depends on the active and continued participation of experts from Member Countries in the Working Party and Panel meetings. The Secretariat prepares and runs all meetings, and coordinates the activity which arises from them. It is responsible for all publication and documentation services (including computer databases).

As a result of the work being done within the different technical bodies of the Organization, EPPO makes recommendations to the National Plant Protection Organizations of its Member Governments. These recommendations are considered as Regional Standards in the sense of the IPPC. In order to ensure an international acceptance, the draft standards go through a rather complex approval procedure (see below).

EPPO’s technical activities are directed by two Working Parties (on PhytoSanitary Regulations, and on Plant Protection Products). Their respective programmes cover: limiting the spread of pests between countries (broadly plant quarantine) and harmonizing activities on plant protection products within countries. Each Working Party meets once a year (in June and May, respectively). The meetings are held in member countries throughout the EPPO region.

The EPPO’s secretariat (Secretariat staff) runs all meetings, and coordinates the activity which arises from them. It is responsible for all publication and documentation services (including computer databases).

**EPPO Bulletin**
A journal of regulatory plant protection, published by Wiley-Blackwell (about 560 pages per year in 3 issues). It contains:
- invited or submitted papers on topical scientific subjects
- new or unusual pest reports
- papers presented at EPPO Conferences
- EPPO standards

**EPPO Standards**
All EPPO Standards are first published, as they are approved, in the EPPO Bulletin. They are also available from the EPPO website (except efficacy evaluation standards – see PP1 database).
- Efficacy evaluation of plant protection products (now in the PP1 database)
- Good plant protection practice
- General phytosanitary measures
- Phytosanitary procedures
- Production of healthy planting material
- Pest Risk Analysis (PRA)
- Safe use of biological control
- Diagnostic protocols for regulated pests
- Commodity-specific phytosanitary measures
- National regulatory control systems

**EPPO Reporting Service**
A monthly information report on events of phytosanitary concern (outbreaks, new pests ...). It can be obtained freely by e-mail.

**EPPO Platform on PRAs**
This online platform includes Pest Risks Analyses (PRAs) produced by EPPO, EFSA, NPPOs and other related agencies of EPPO member countries. The aim of this platform is to share documents and information on PRA activities within the EPPO region.

**EPPO Publications**
- EPPO Bulletin
- EPPO Standards on Efficacy Evaluation of Plant Protection Products (PP1) are now published as a web-based database. All general standards can be accessed free of charge. Access to specific standards is provided for an annual fee.
  - https://pp1.eppo.int
- EPPO Global Database
  - EPPO Global Database is a free online database which contains all EPPO pest-specific information: pest and plant names and their associated computer codes (EPPO Codes), geographical distributions, host plants, Standards, Reporting Service, data sheets & pictures. More will be added, as the database is still under development.
  - https://gd.eppo.int
- EPPO Web Site
  - The official EPPO web site gives details on the aims, activities, standards, publications and databases of the Organization.
