EPPO Standard PP 1/239
'Dose expression of PPP',
status and use of this
standard based on the
results of the Dutch
workshop in 2009

Erwin Mol
NPPO the Netherlands

Previous meetings

- EPPO meeting in Paris in 2001.
- Meeting 'Tree Fruits Dose Expression and Adjustment Discussion Group' in Wageningen in 2009.

Agreements meeting 2009

- Maximum doses and spray volumes on the labels;
- All relevant information available in trial reports to convert to other expressions;
- Use of 3-dimensional expressions;
- Conversion to other expressions;
- More glossary of terms.

Conclusion: more harmonization is needed, but no agreement on a harmonized system of dose expression.

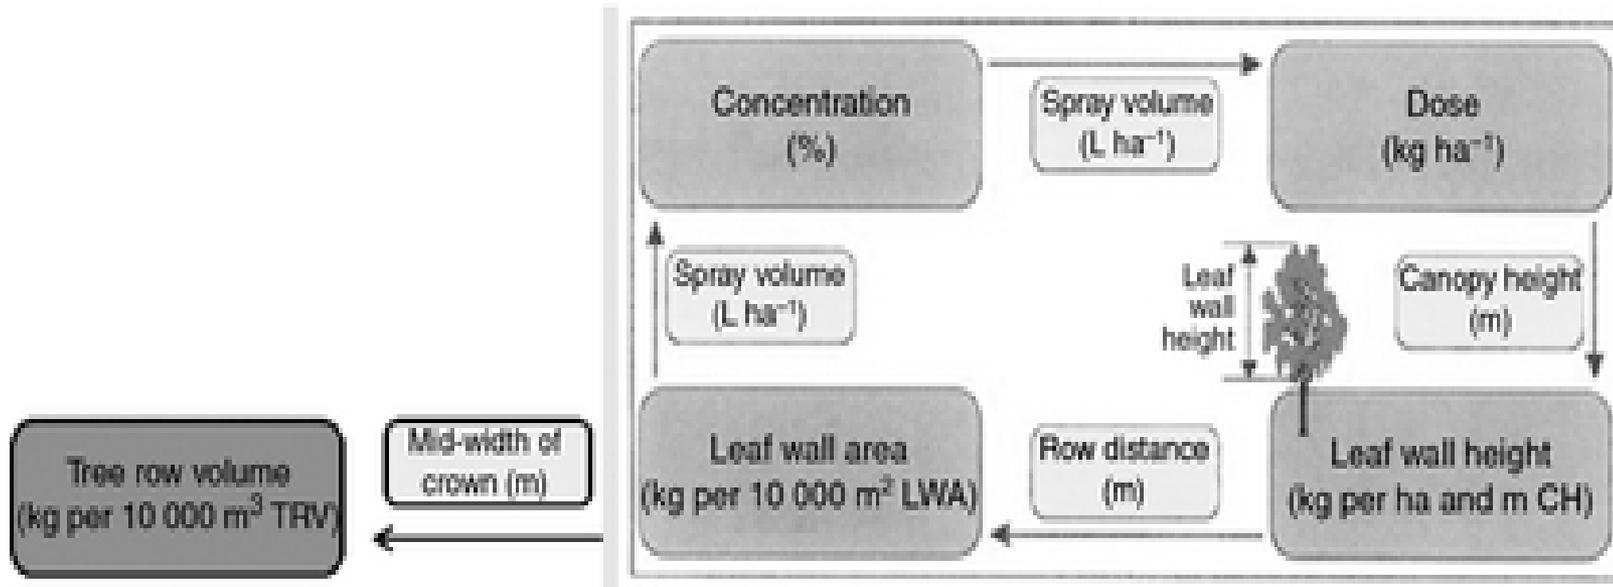

EPPO Standard PP 1/239 'Dose expression of PPP'

- First approved in 2005.
- Updated in 2012 with appendix 'Conversion of doses in 3-dimensional crops'.

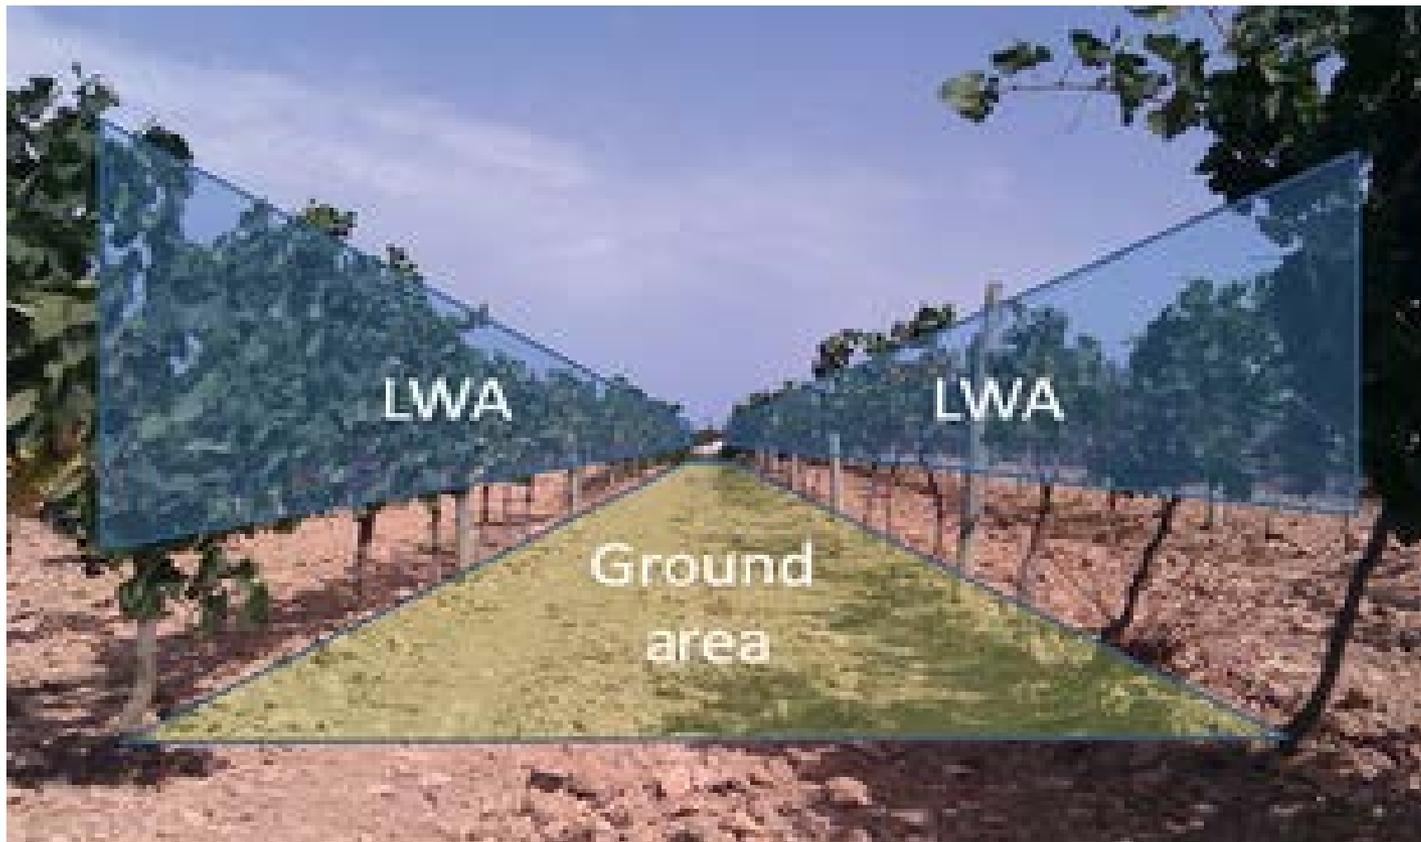

Conversion of doses in high-growing crops

Expression methods in a standard structure

But ...

Conclusion

EPPO standard is an efficient converting tool, it is a step forward..., but is it the real solution for zonal evaluation ?

IT IS TIME FOR THE NEXT STEP !
