

# State Inspection of Plant Health and Seed Inspection Service

## Pest reporting and exchange of phytosanitary information in Poland

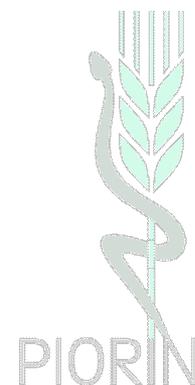

**dr Julia Górecka-Podstawka**  
**Phytosanitary Supervision Division**  
**Main Inspectorate of Plant Health and Seed Inspection Service**

Collecting of information about occurrence of regulated organisms in Poland is official action performed by The State Plant Health and Seed Inspection Service, official body under the meaning of Council Directive 2000/29/EC. The Service is supervised by the Ministry of Agriculture and Rural Development.

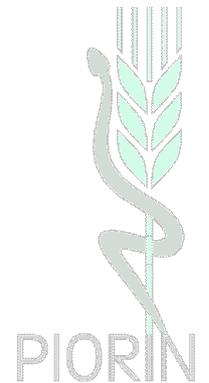

Inspections and audits of places of production, distribution and controls on importers are carried out by employees (official inspectors) of SPHSIS local organizational units, supervised by 16 Voivodeship Inspectorates.

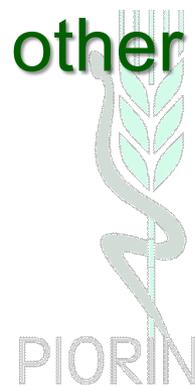

Official controls are carried out in accordance with the guidelines and instructions unified for the whole country.

Health checks are targeted at selected quarantine and regulated pests under the laws of the European Union.

Information about the suspected occurrence or the presence of regulated harmful organisms are collected by Voivodeship Inspectorates and reported to the Phytosanitary Supervision Division in The Main Inspectorate of Plant Health and Seed Inspection Service, that is responsible for supervision of VIPHSIS and contacts with European Commission and NPPOs in other countries.

**Thank you for your kind attention**
