

The European and Mediterranean Plant Protection Organisation

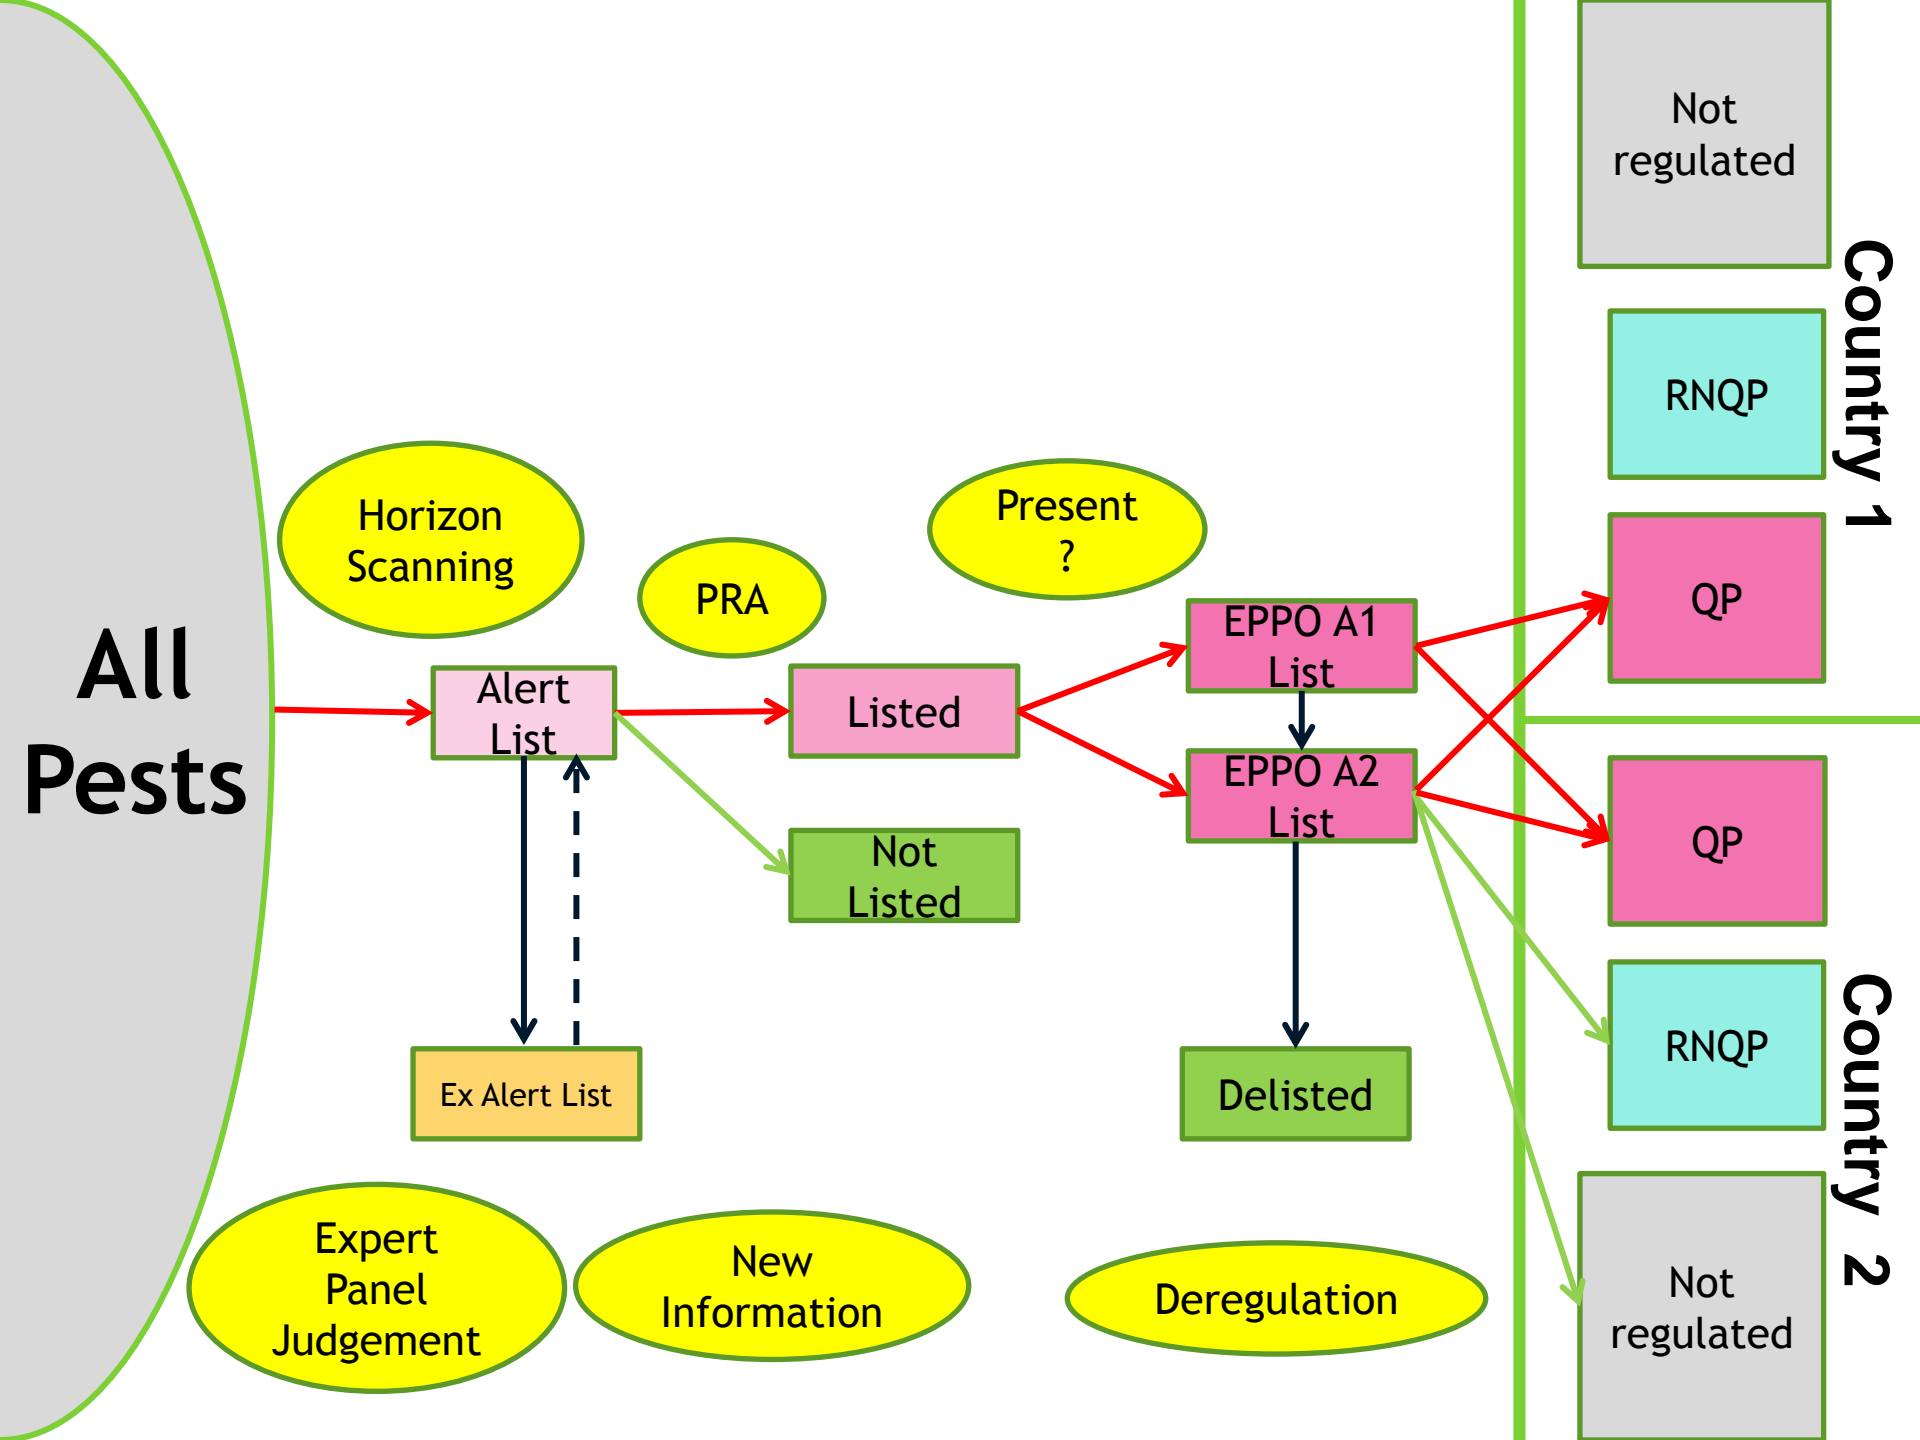

EPPO process to recommend listing of new regulated pests

Event: EEC/EPPO Workshop on Regulated Pests:
risk analysis and listing

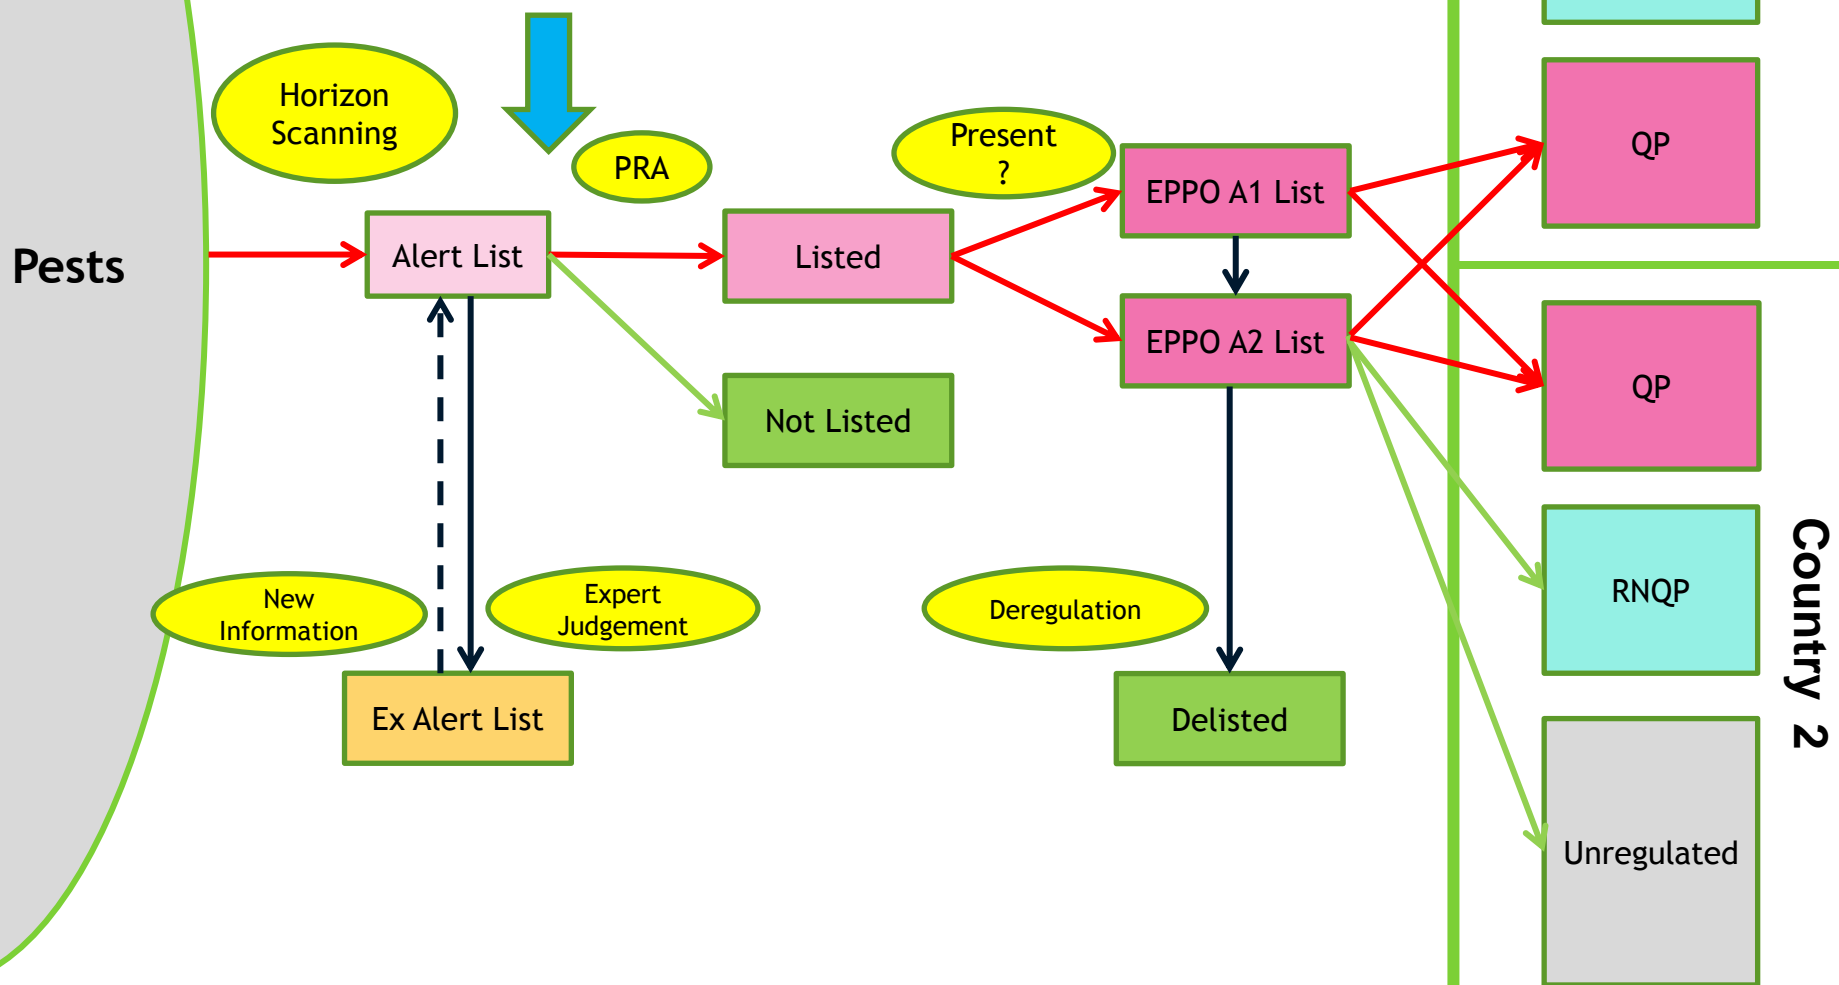

Date: 2018-06-6/8

Martin Ward (Director General) - hq@eppo.int

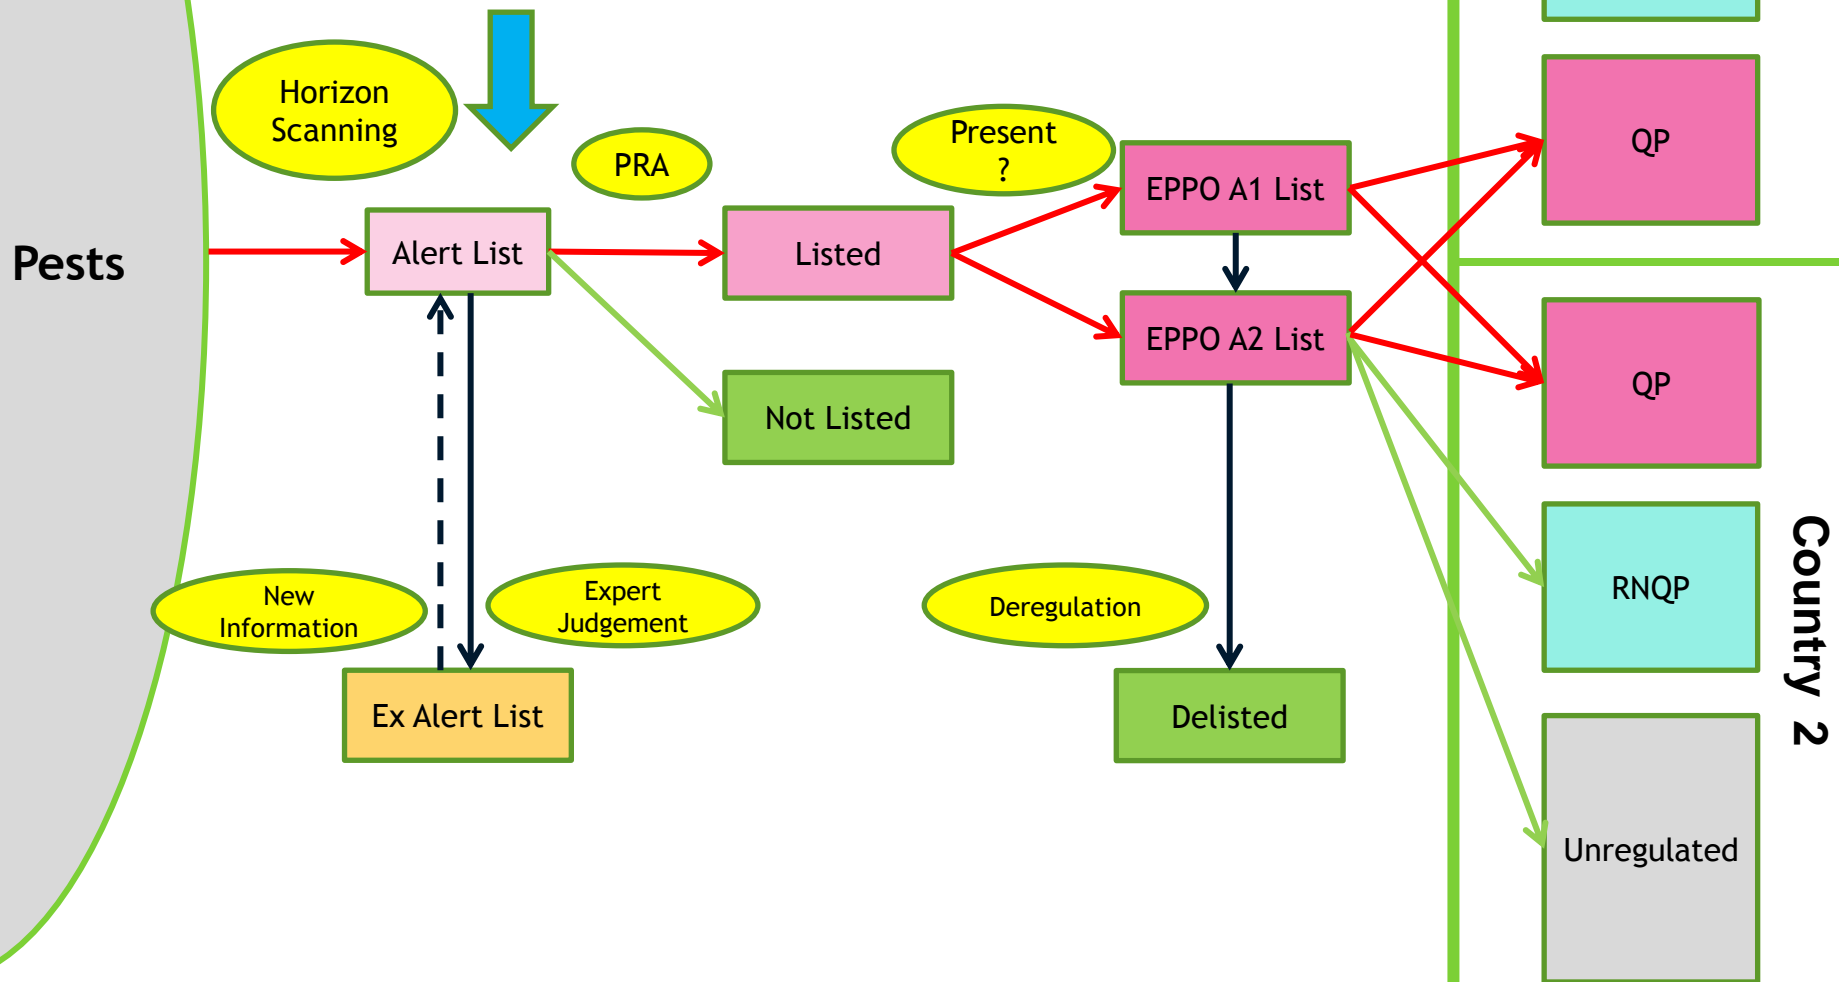

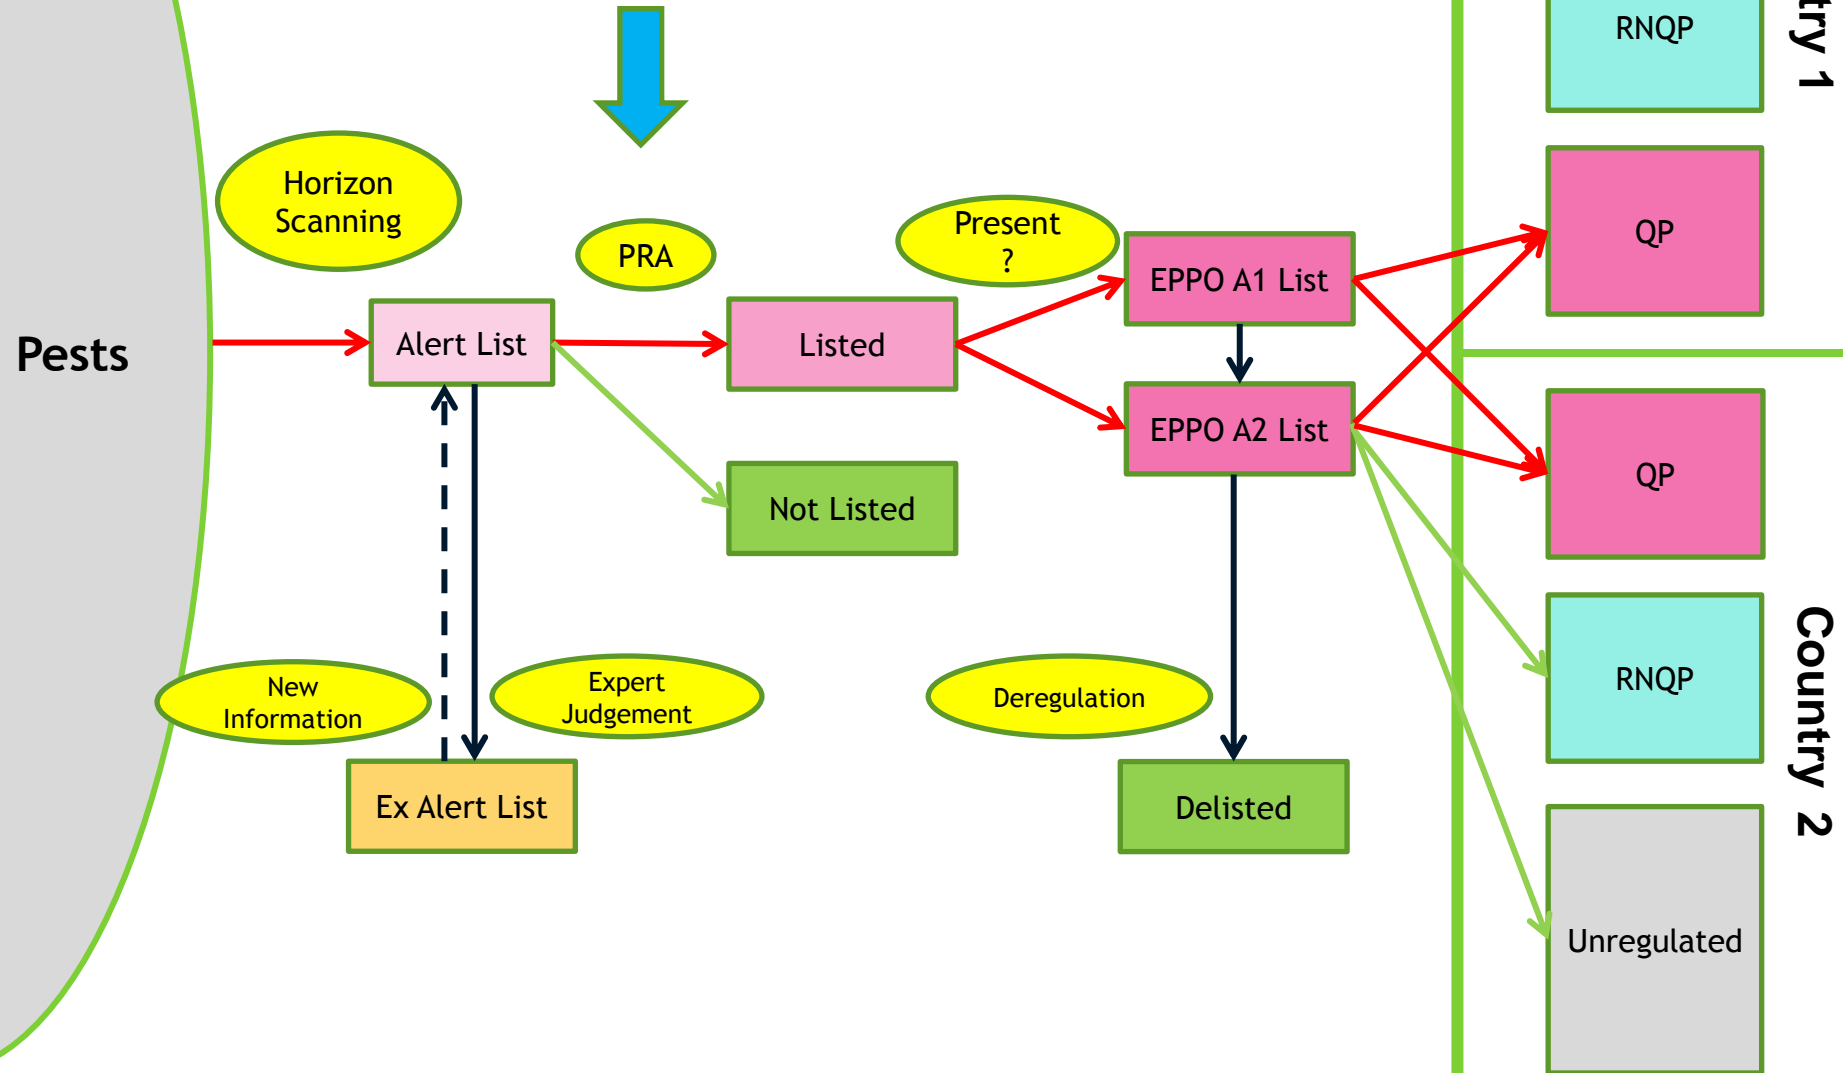

How to prioritise PRAs? (for plants there is a Standard PM5/6)

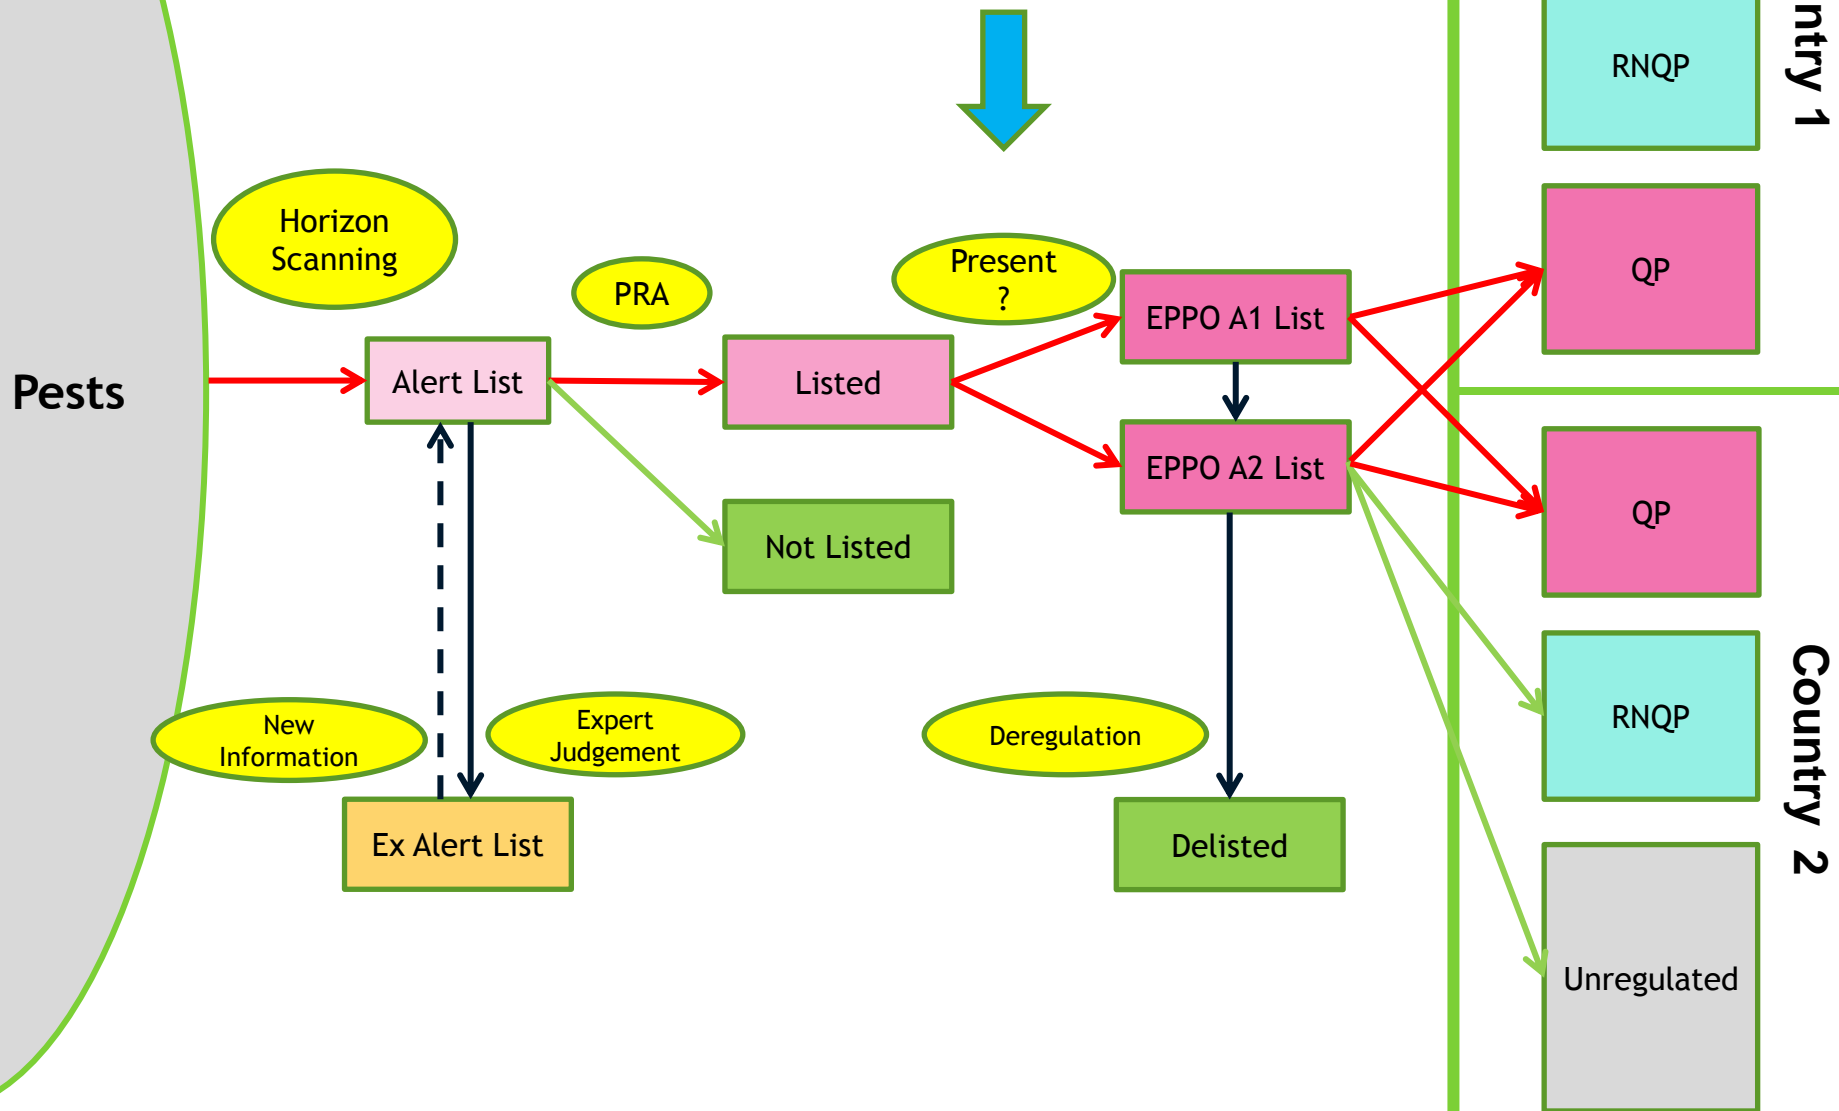

Do pests have to go on the alert list in order to be priorities for PRA?

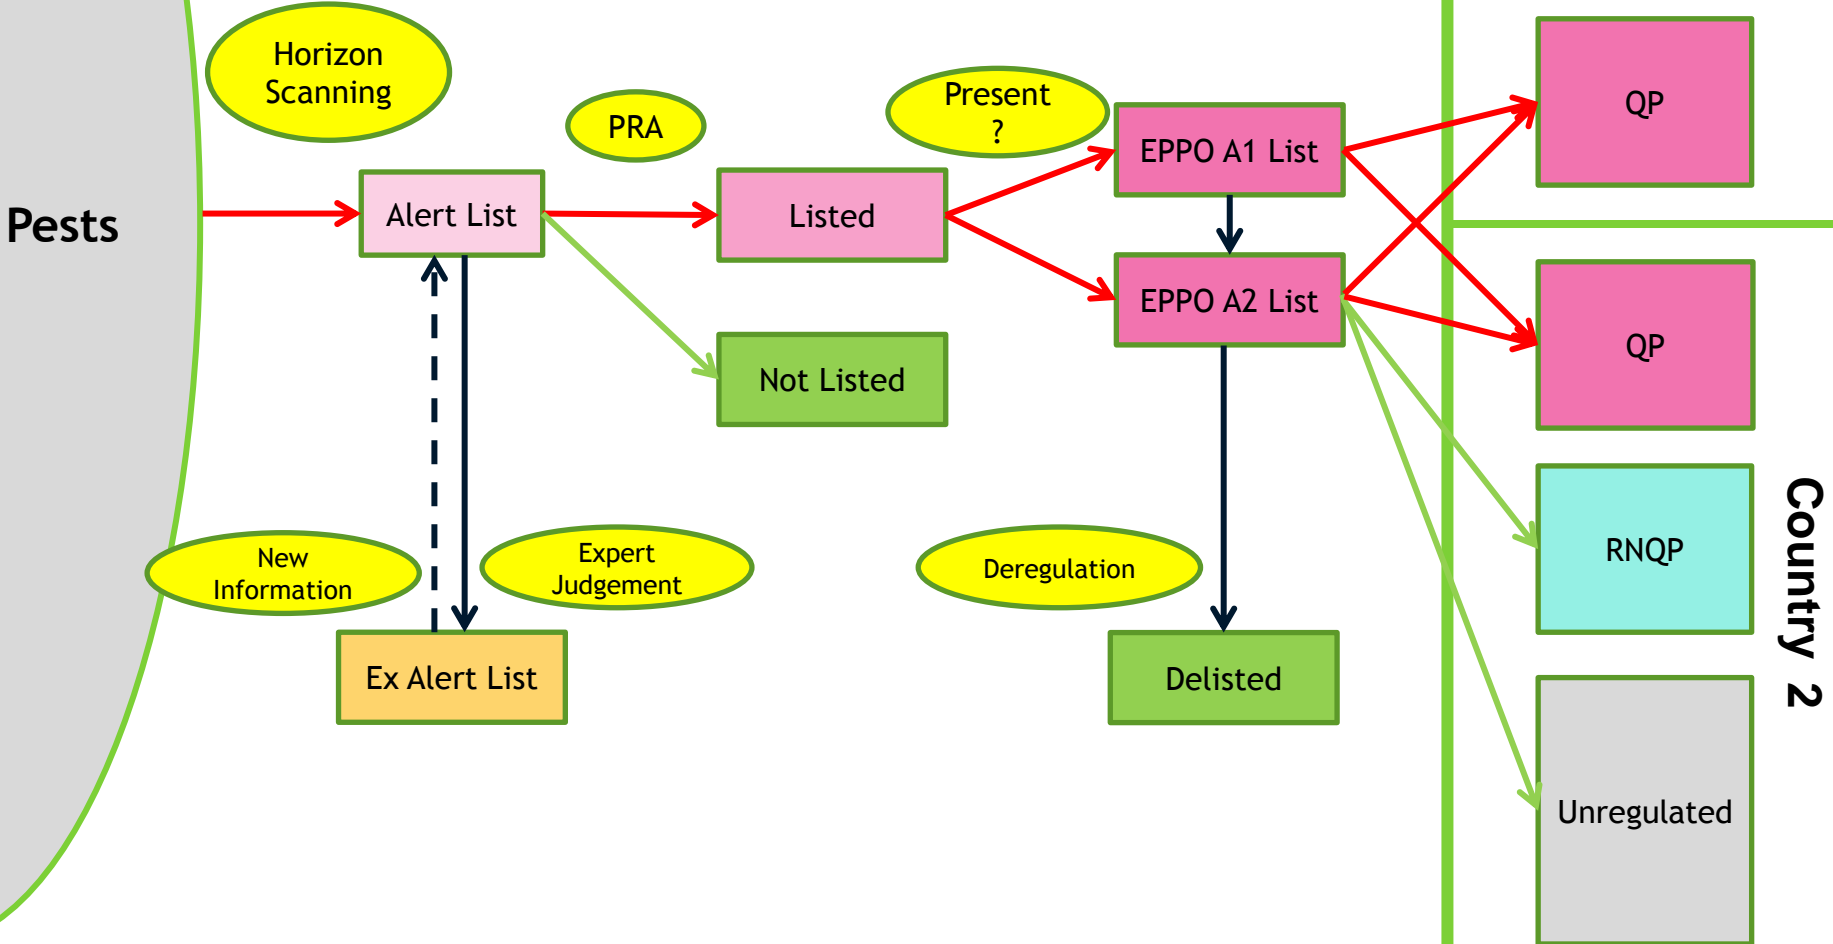

Is the PM5/5 Standard (express scheme) sufficient to recommend regulation?

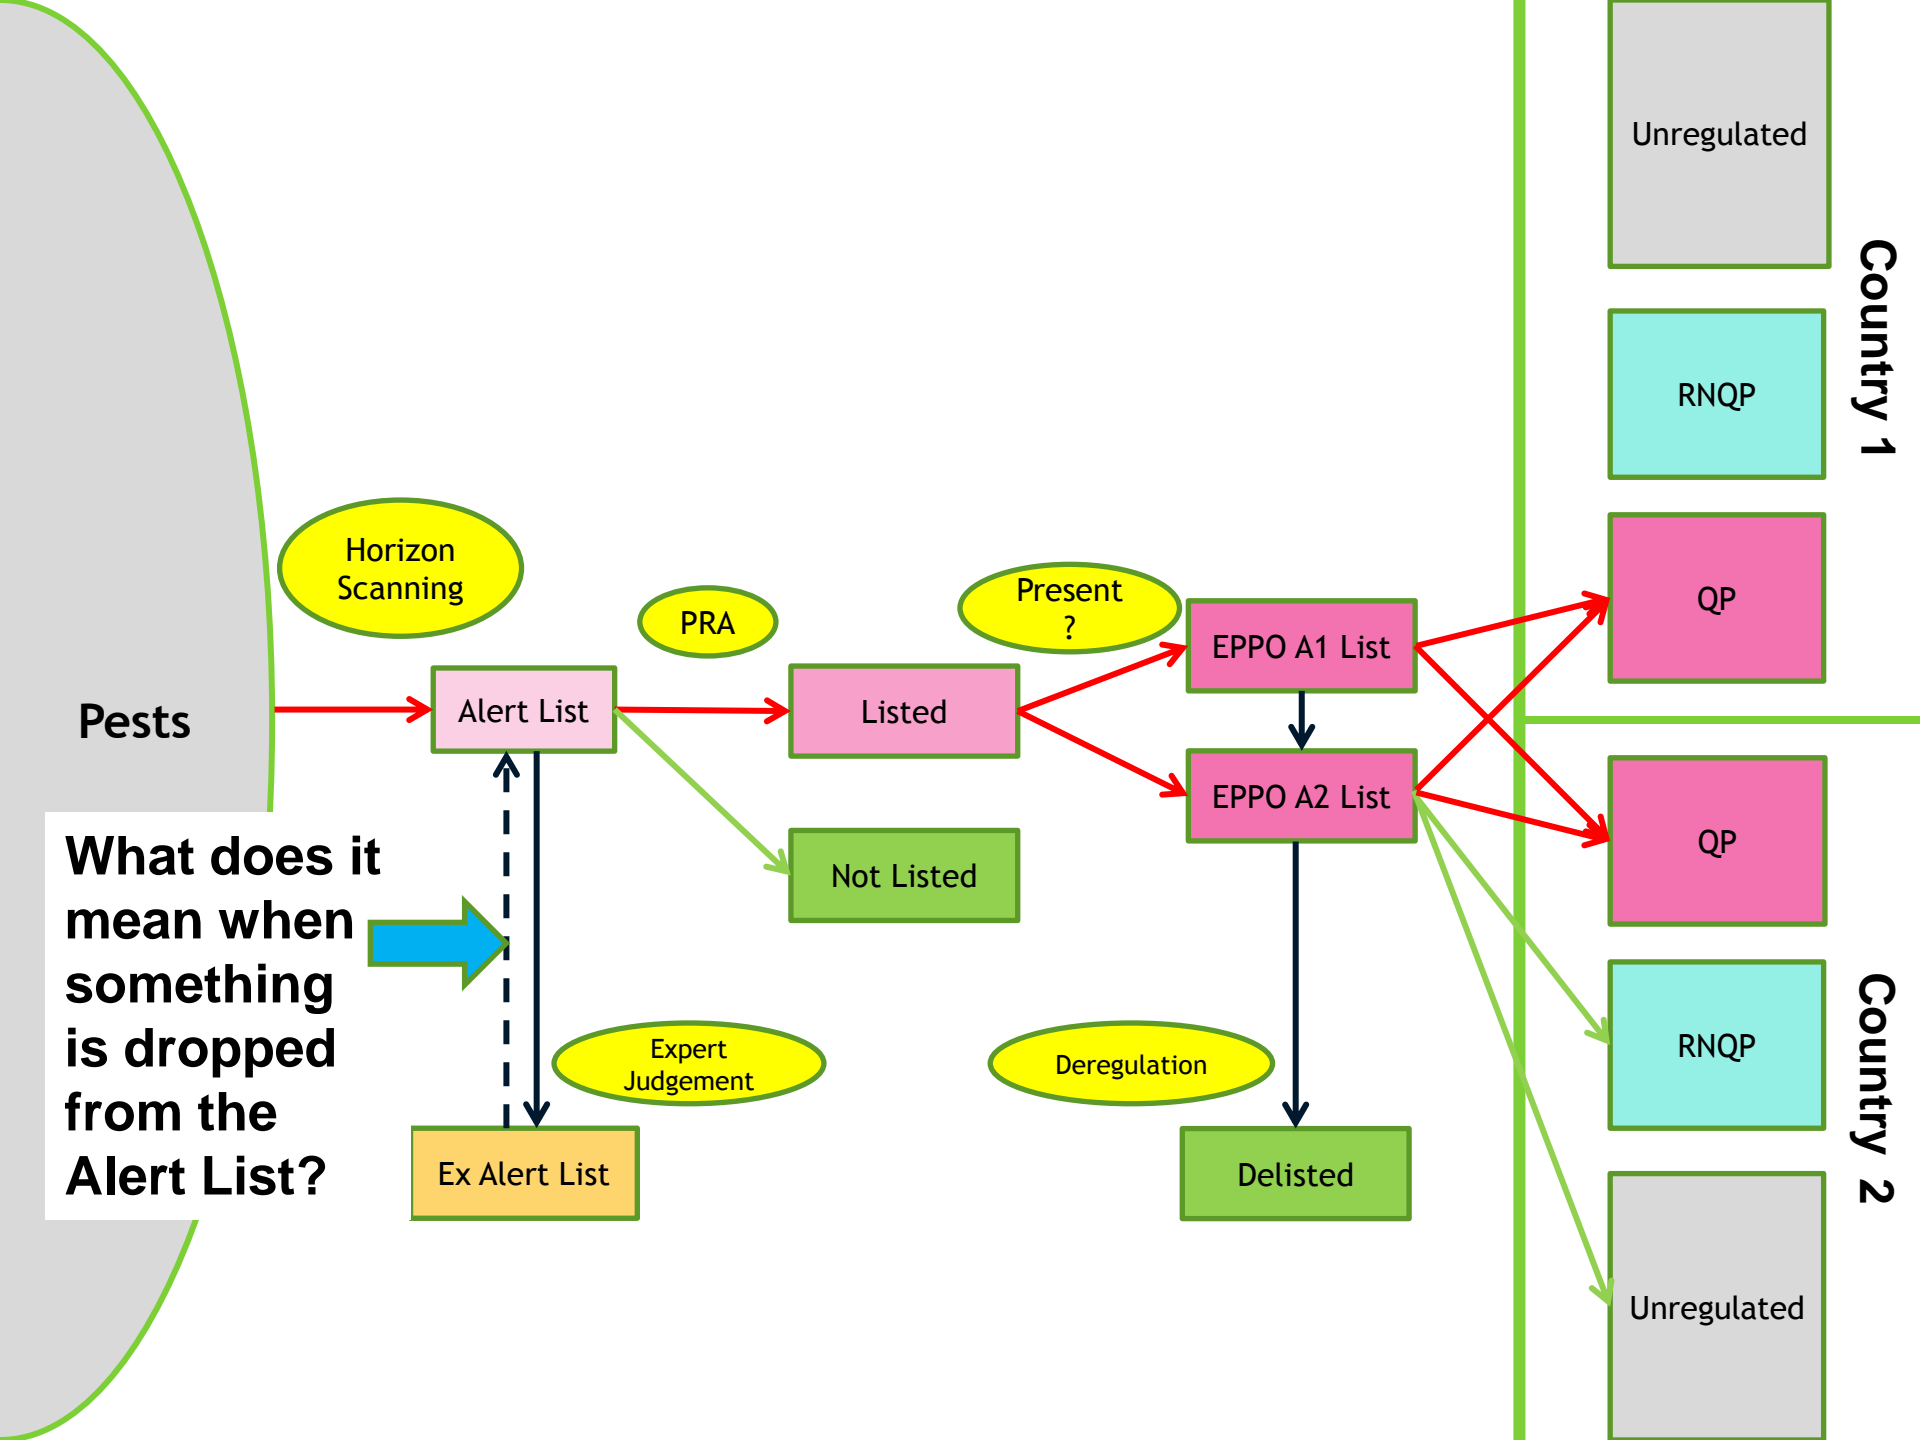

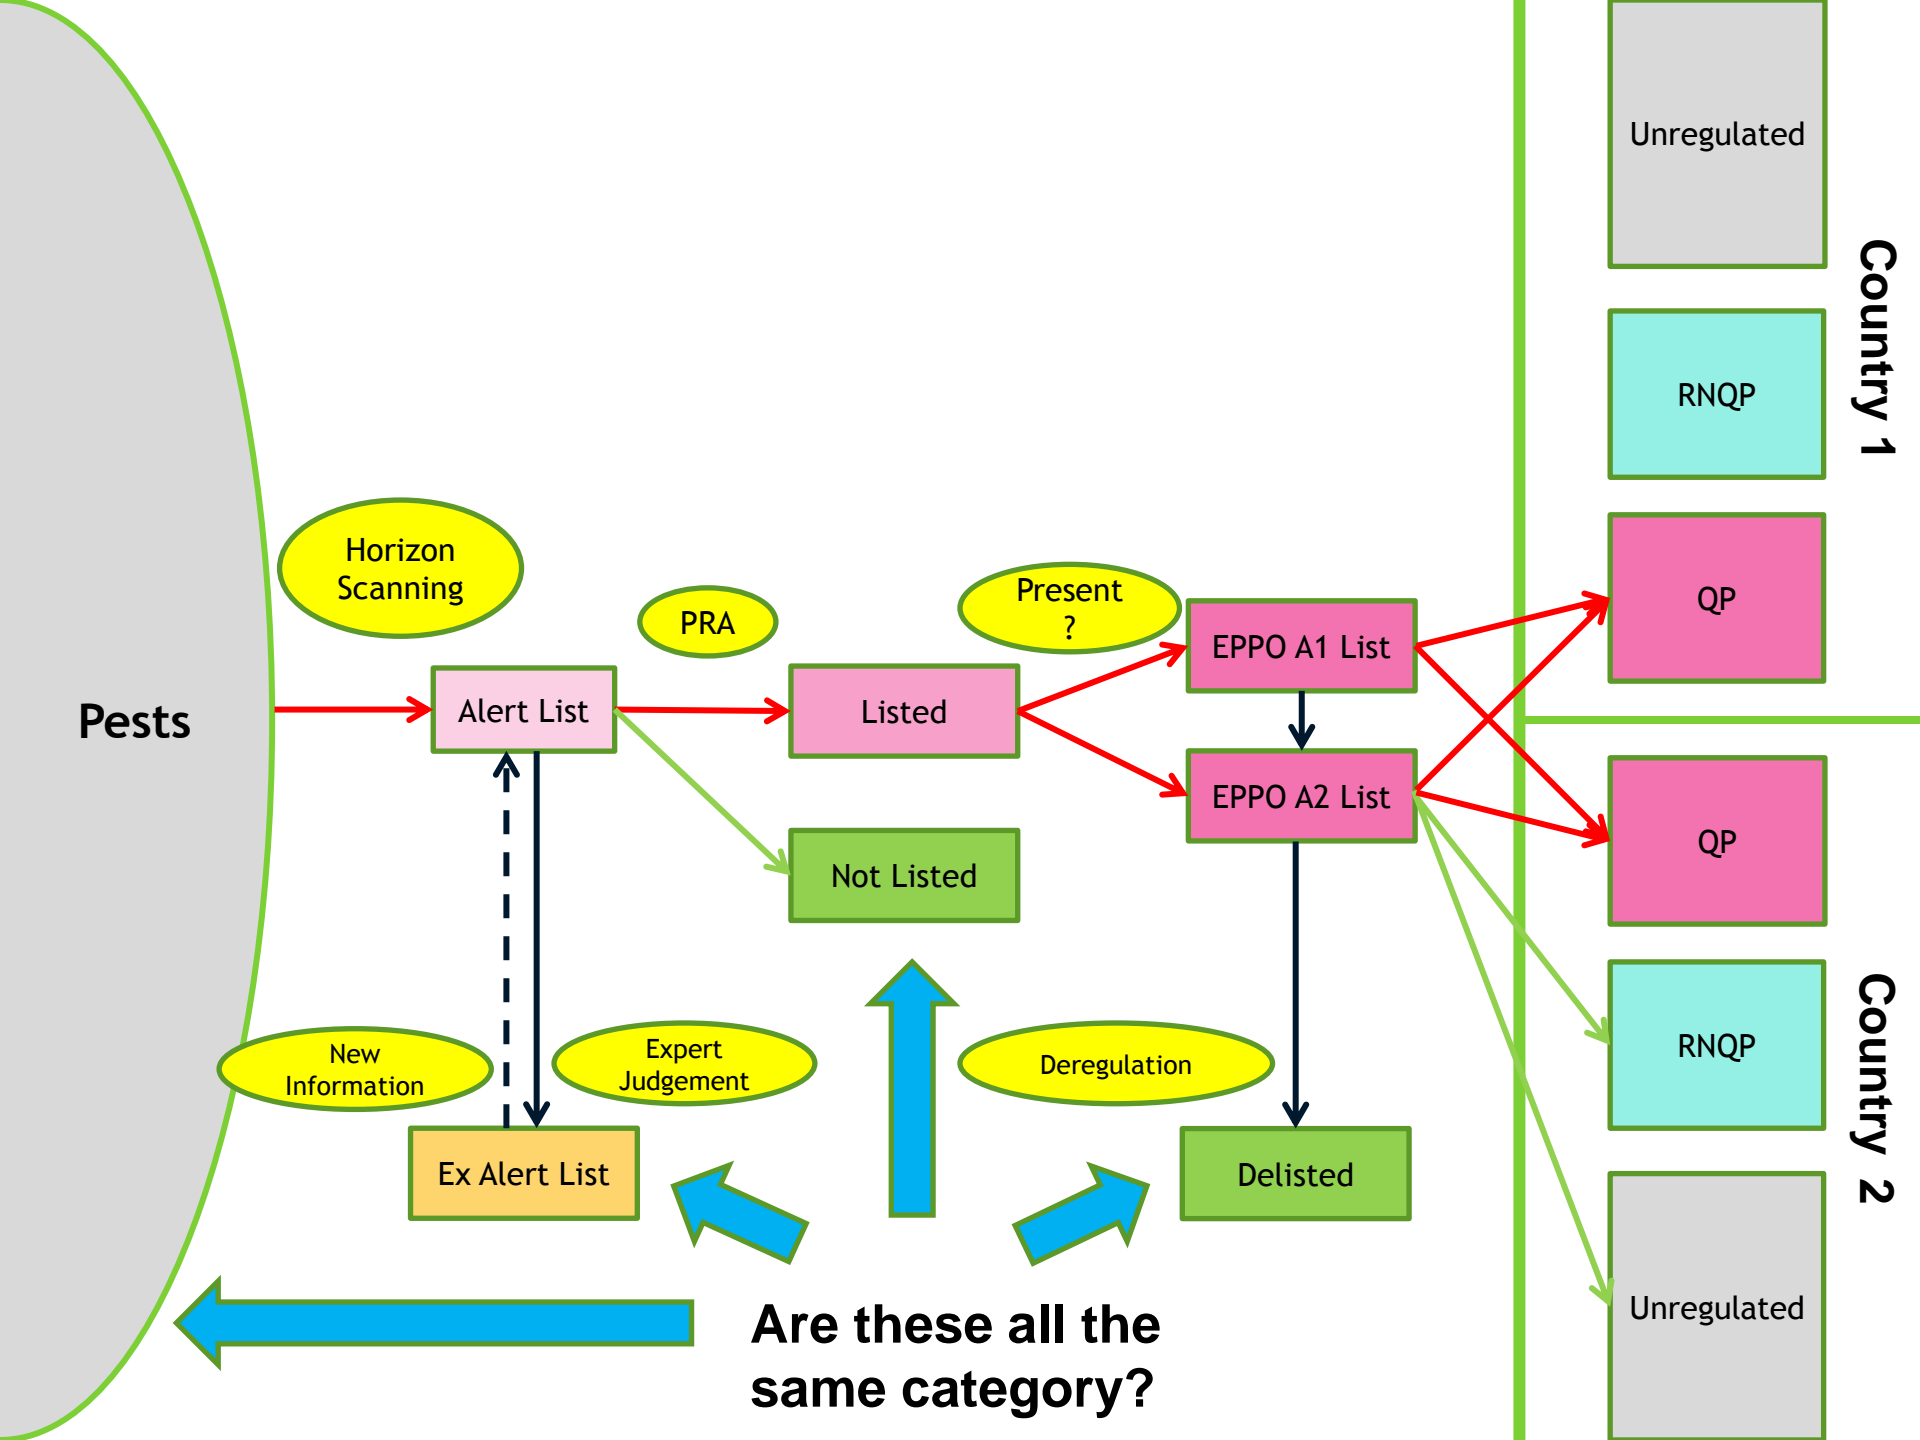

Is the A1 vs A2 decision based on facts of presence, or scope of recommendation: to all or part of the EPPO region?

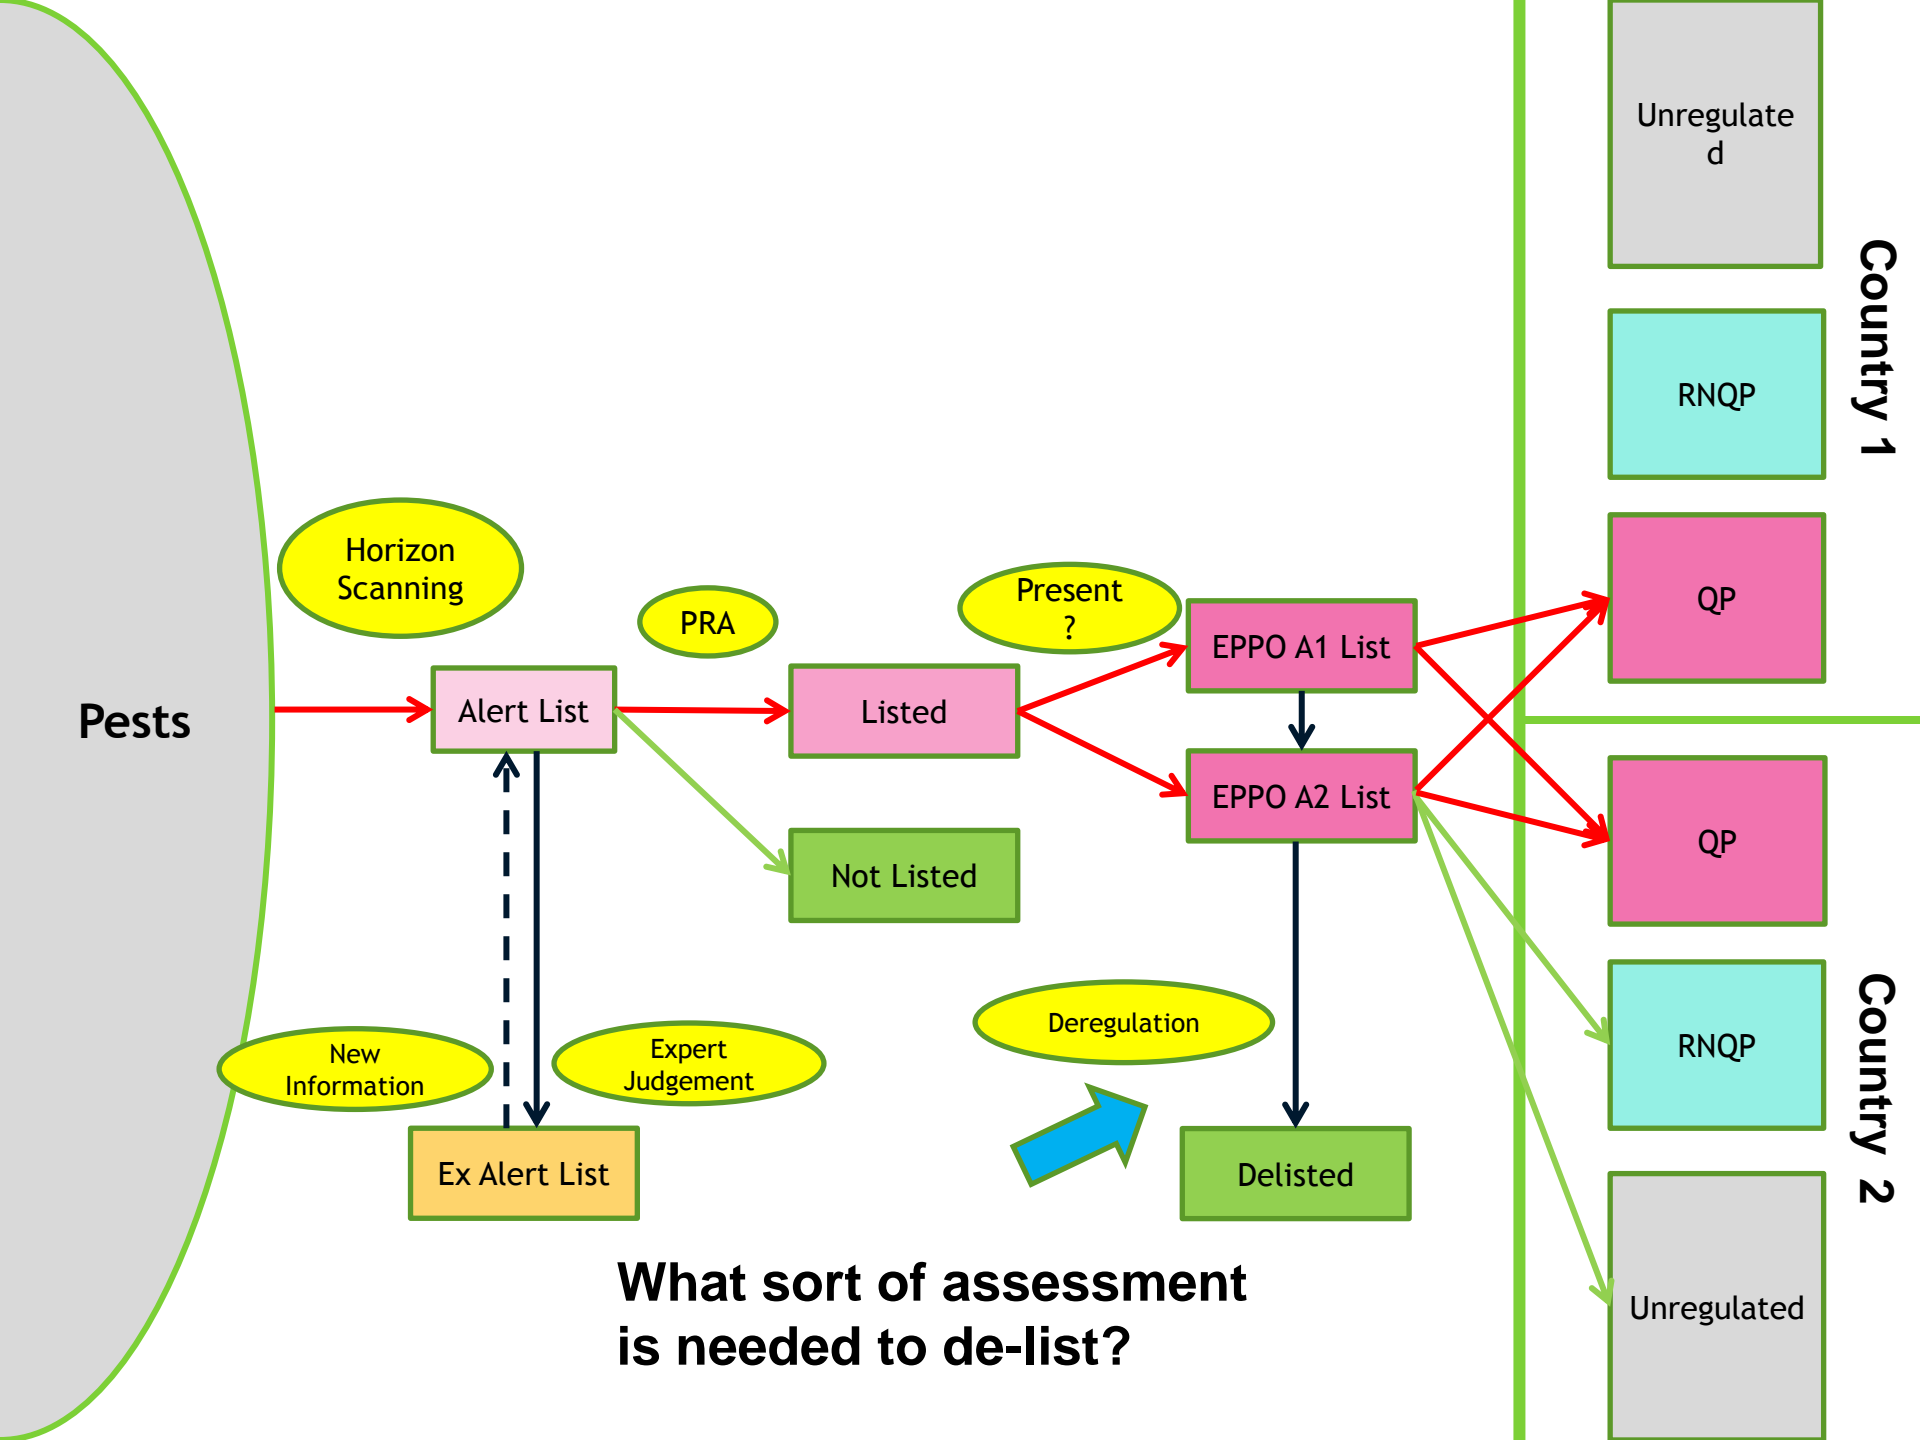

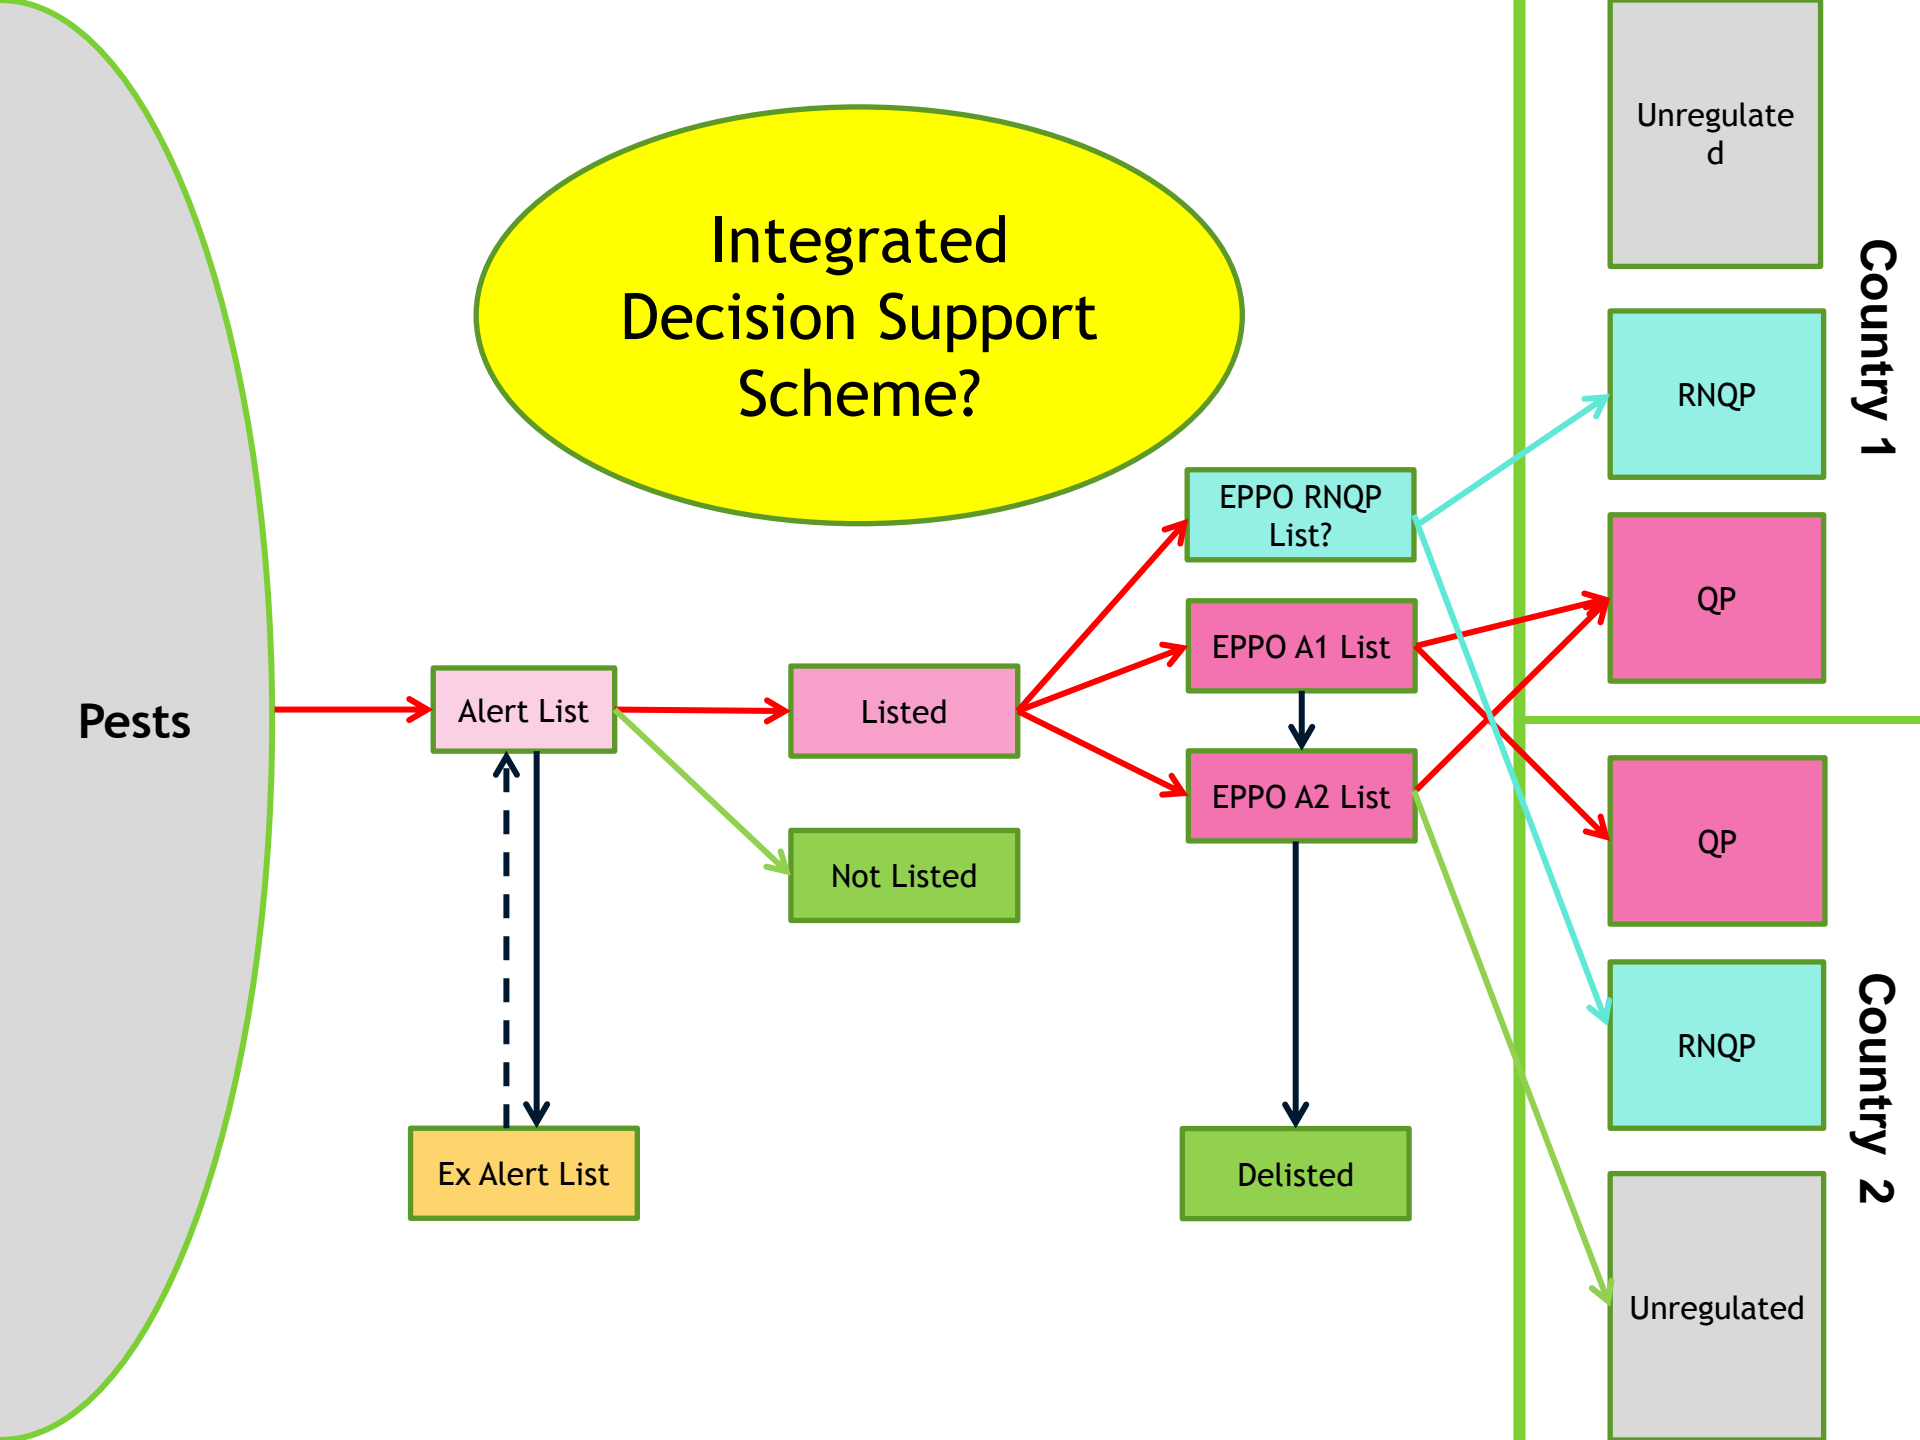

What sort of screening process for recommendations on RNQPs?

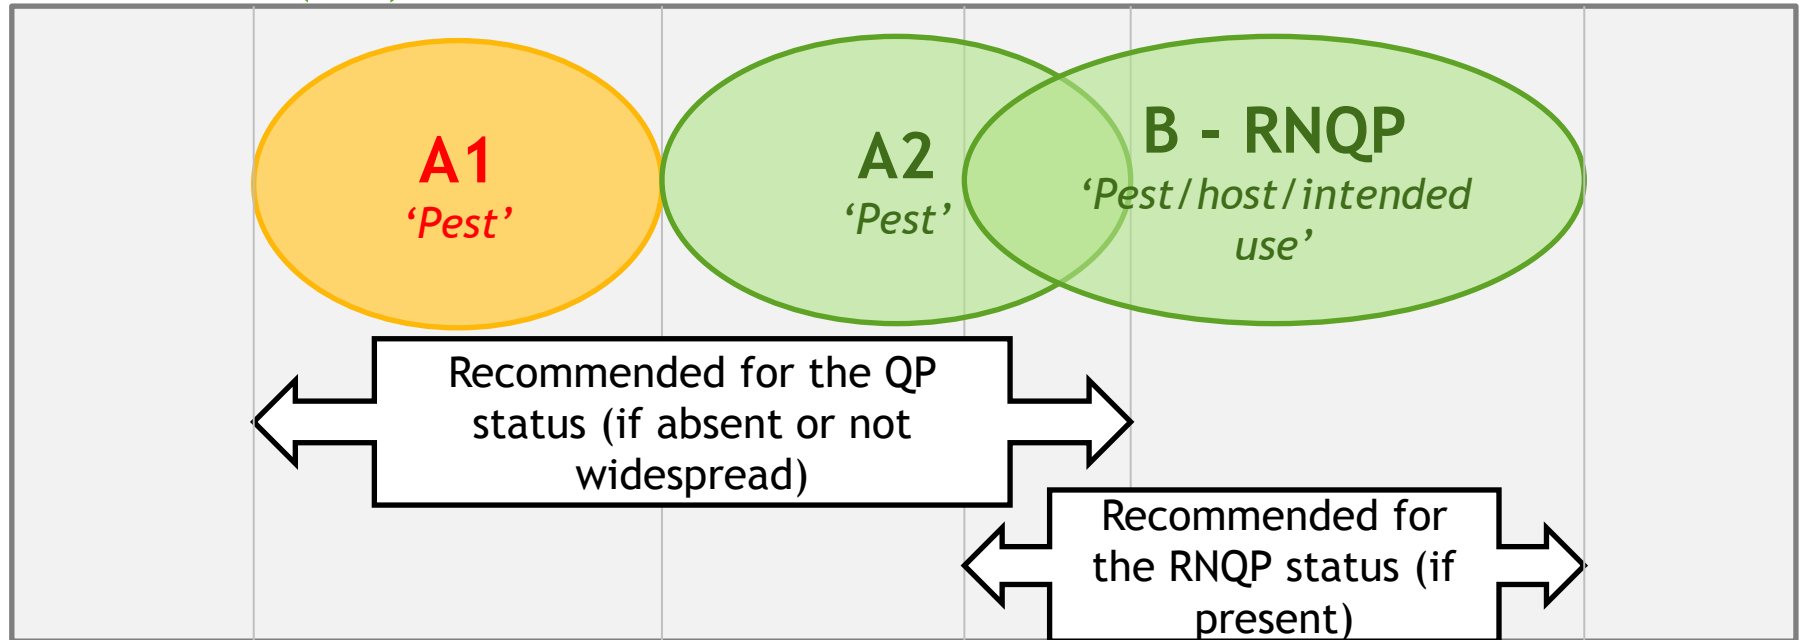

2.2 - Additional possible follow-up activities

- *Development of a EPPO list of RNQPs and revision of PM 1/2 (26)*

Remarks:

- RNQP project only considered pests from EU MD or IIA2 AWG;
- Consequence on the A2 List: pests widespread in almost all EPPO countries and added to the B list could be considered for deletion from the A2 list.
