

EPPO CODES

New developments in the framework of EU grant agreements

Anne-Sophie Roy (Information Manager) - roy@eppo.int

Achievements in 2018

- Grant agreements (co-funding) with the EU Commission were signed:
 - in December 2017 for a 12-month period (2018)
 - in December 2018 for a 36-month period (2019-2021)
- With the help of Ms Grousset, **6 839 codes** were created in 2018, mainly for:
 - Exotic tree species that are imported into Europe
 - Pests that are included in quarantine lists of non-European countries
 - Plant viruses (ICTV 2017)
 - Specific requests made by users

IT Tools

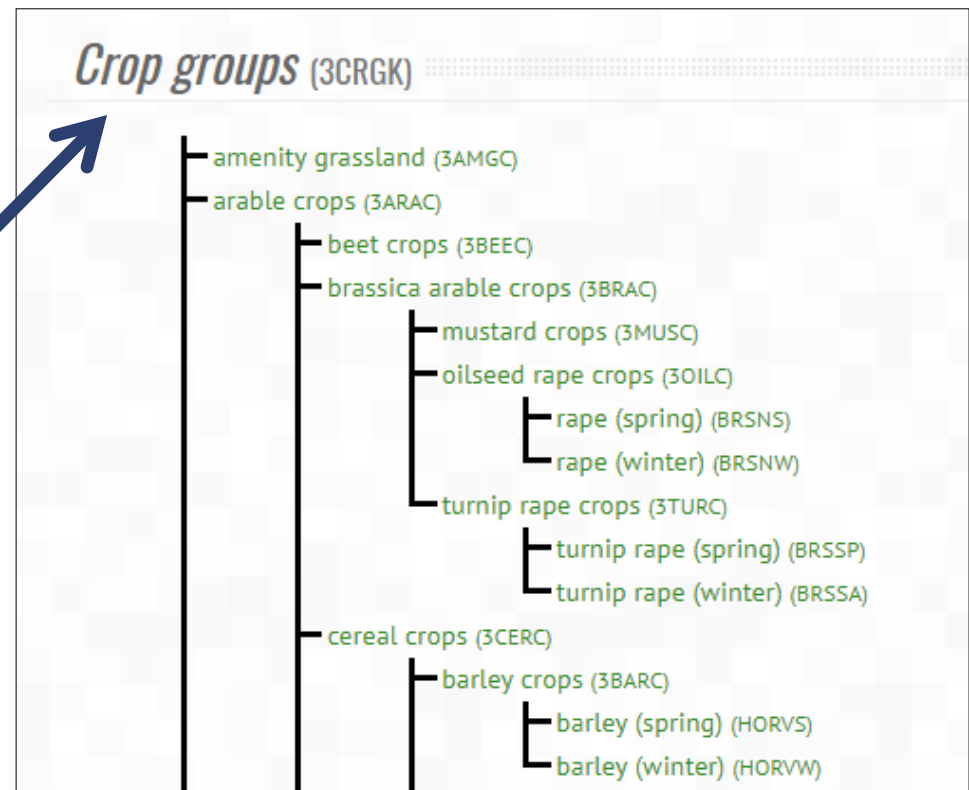

- Webservices have been further developed to help users to query the database rapidly
- In July 2018, GD Desktop (off-line version of the EPPO Global Database) was launched. Regular updates will be made (e.g. 2-3 per year).
- New IT tools have been created for the EPPO database administrators (e.g. to manage long lists of missing codes)

EPPO harmonized classification and coding of the uses of plant protection products

- All accepted codes for the EPPO harmonized classification of PPPs uses have been transferred into GD (>120 in 2018)
- Classification of PPP uses can now be visualized

In the general menu of GD,
select Explore by
'PPP uses classification'

Group	EPPO Code	
Crop groups	3CRGK	View the expanded list...
Treated objects	3NCRK	View the expanded list...
Targets	3TARGK	View the expanded list...
Crop destinations	3CRODK	View the expanded list...
Crop locations	3CROLK	View the expanded list...
Treatments	3TREAK	not available
Qualifiers	3QUAL	not available

Taxonomy explorer

In the general menu of GD,
select Explore by
'Taxonomy explorer'

Taxonomy explorer

Preferred name	EPPO Code	Level	view

Anobium punctatum	ANOBPU	Species	

EPPO Codes monthly newsletter

- **Free newsletter addressed to EPPO Codes users (emails)**
- **Summary of the main modifications made during a month**
 - list of newly created codes
 - list of deactivated codes with their replacement codes (if appropriate)
- **Lists are automatically generated from the database**

For clarity, other modifications (changes in preferred scientific names, authors, synonyms, common names) are not shown but these modifications can be traced in the core database

EPPO Codes Monthly Newsletter: 2018-11

This free newsletter is addressed to all EPPO Codes users. Its objective is to summarize the main modifications that have been made to the database during a monthly period (the month covered is indicated in the title) and provide users with an easy and transparent way of tracing major changes. The Newsletter contains a list of newly created codes and a list of deactivated codes with their replacement codes. These lists are automatically generated from the database. Other modifications concerning data that is related to already existing codes, such as changes in preferred scientific names, authors of scientific names, synonyms, common names are not shown to keep the Newsletter easy to read. However, these modifications can be traced in the core database files (e.g. for users who are downloading EPPO Codes files via the EPPO Data Services). More general information about the EPPO Codes can be found on the [EPPO website](#).

Summary

New codes	327
Deactivated	13

New codes

Microorganism

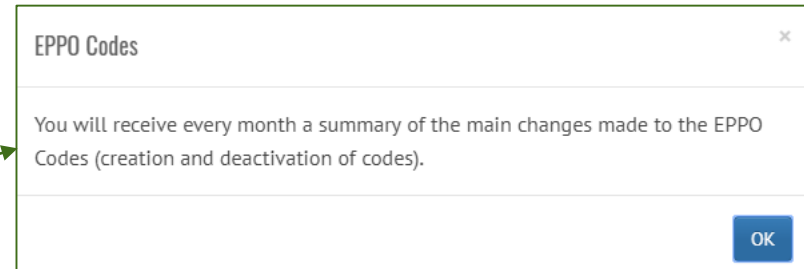

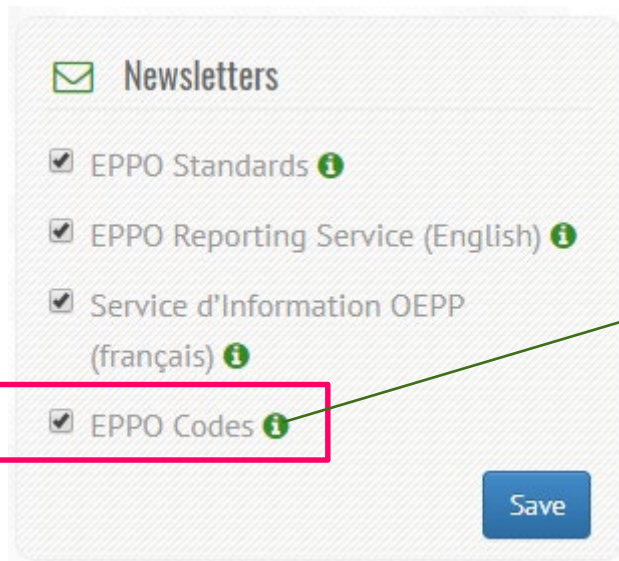

Code	Pref name
DIAPNV	Diaporthe novem
LETLCH	Leptolegnia chapmanii
MOCHSP	Monochaetia sp.
MTRHBR	Metarhizium brunneum
MTRHGU	Metarhizium guizhouense
MTRHLE	Metarhizium lepidictae
MTRHRO	Metarhizium robertsii
NPESRO	Neopestalotiopsis rosicola
NPESP	Neopestalotiopsis sp.
PHOPDI	Phomopsis diachenii
PPESP	Pseudopestalotiopsis sp.
TRCDAG	Trichoderma aggressivum
UROMSA	Uromyces savulescui

EPPO Codes monthly newsletter

How to register?

- 1) Create your free account in the EPPO Global Database
- 2) Login
- 3) In your dashboard, choose the EPPO Codes Newsletter

Plans for 2019 and beyond

- Continue to populate the database with more codes
 - Pests for which sequences are available in Q-bank database (diagnostics)
 - New virus species (ICTV 2018)
 - Quarantine pests and their host plants
 - Specific requests from users
- Reflect on consequences of taxonomic changes
 - 'One fungus - One name'
 - Revision of some important insect groups (e.g. noctuids, psyllids, true bugs, weevils)

Plans for 2019 and beyond

- Finalize the harmonized classification of PPPs uses with the EPPO Panel
- Continue to release the EPPO Codes monthly newsletter
- Continue to exchange with users of the database and get feed-back

Thank you for your attention
